Air    O<sub>2</sub> ~ God's spirit    N<sub>2</sub> ~ earth/world    CO<sub>2</sub> ~ man's spirit  
      CO ~ devils        CH<sub>4</sub> ~ familiar spirits

The largest source of CO is natural in origin, due to photochemical reactions in the troposphere. Other natural sources include volcanoes and combustion (~ forest fires).  
CO - colorless, tasteless, odorless

**Methanogenesis** or **biomethanation** is the formation of CH<sub>4</sub> by microbes known as methanogens. These organisms live in close association with anaerobic bacteria. The production of methane is important and a common form of microbial metabolism. It is the final step in the decomposition of biomass.

### Air Pollution

man made - Sulfur oxides (SO<sub>2</sub>) - pungent, rotten smell  
              Nitrogen oxides (NO<sub>2</sub>) - reddish-brown; sharp, biting odor  
              particulates - industrial activity, e.g. soot particulates & smog

### Our Eternal State

We believe in the bodily resurrection of all men, the saved to eternal life, and the unsaved to judgment and everlasting punishment (Matthew 25:46; John 5:28, 29, 11:25-26; Revelation 20:5-6, 12-13). We believe that the souls of the redeemed are, at death, absent from the body and present with the Lord, where in conscious bliss they await the first resurrection, when spirit, soul, and body are reunited to be glorified forever with the Lord (Luke 23:43; Revelation 20:4-6; II Corinthians 5:8; Philippians 1:23, 3:21; I Thessalonians 4:16-17). We believe that the souls of unbelievers remain, after death, in conscious misery until the second resurrection, when with soul and body reunited they shall appear at the Great White Throne Judgment, and shall be cast into the Lake of Fire, not to be annihilated, but to suffer everlasting, conscious punishment (Luke 16:19-26; Matthew 25:41-46; II Thessalonians 1:7-9; Jude 6-7; Mark 9:43-48; Revelation 20:11-15)
